Employment History

2025

Front end developer | Buildhive | Ibeju Lekki.

I created the frontend for a freelance website for construction workers, using the react framework and tailwind css.

2023

Web Developer | Living Faith Church Rumuodumaya

Responsibilities:

- Drafting the initial wireframe design, after which the PM team took over.
- Creating the UI with the React JavaScript framework and SCSS.
- Creating content for the website.

2023 - 2023
2 Months

Typesetter / Graphics designer | AG Fastlink

Responsibilities:

- Typesetting documents to be printed by small scale organizations like schools, churches etc.
- Creating visuals for clients on demand.

Achievements:

- Increased productivity by a wide margin, typesetting over 200 pages within 8 working days.
- Filled in for the graphics designer on short notice, on days when he was unavoidably absent, preventing loss of business and customer dissatisfaction.

Education

2013 - 2019
6 Years

S.S.C.E | Federal Government College Port Harcourt

Activities

2024

Bag and Shoe Making | Self Employed

Projects

Business Website

Courses

Microsoft introduction to data analysis,
Linkedin Learning

07/2024 - 08/2024

ALX AiCE, ALX

Software Development , 3MTT

12/2023 - 03/2024

Software Development, DFA 2.0

04/2025 - 06/2025

Whatsapp

Hobbies

- Reading
- Writing (articles, poems, copy etc.)
- Music
- DIY

I created a website for my startup using the Angular JavaScript framework, implementing a kind of pseudo backend on the front end; I created a json file that contained some articles and other write-ups, and rendered them directly on the front end, simulating a backend. I arranged them in collections similar to a noSQL DB and added a foreign key to them so they could be grounded by category as well as sorted by name.

LFC project

I assisted the development team as a junior web developer, building functionality for a website for my church.
